

Alana DeLoach
Consultant

Alana DeLoach has 5 years of experience in vibration and noise control consulting and has been with Colin Gordon Associates since 2020. Her consulting activities at Colin Gordon Associates and previous employers have included site vibration assessments, architectural acoustics, mechanical noise and vibration control, construction noise and vibration impact assessment and monitoring, structural dynamics testing, and environmental noise evaluations.

Her project work continues to address university research laboratories, vivaria, medical office buildings, hospitals, biotech, university and national laboratories, mission critical facilities, infrastructure, industrial, residential, and corporate/mixed-use buildings.

She has worked in all phases of facility design and renovation projects: EIS/EIR, Feasibility Studies, Site Evaluation, Programming, Conceptual Design, Schematic Design, Design Development, and Construction Document drawings and specifications, as well as interface with clients and other consultants.
